Agenda

What is wiremock?

Making use of Junit5

Cons and pros

What is wiremock?

"Mock your APIs for fast, robust and comprehensive testing

Wiremock goodies

- standalone or executed by java code
- *mappings, __files*
- *community & tools: mocklab*
(supports openapi 3)
- *recorder feature*

Wiremock and Junit5

Cons and pros?

Cons

- doesn't work ;p (depends heavily on jetty...)
- needs extra file for single mapping
(multiple mappings support to be released!)

Pros

- readability of mapping definitions
- easy recording ready-to-use mappings
- support from author

Thank you!
